Installation Instructions
JOS-Cnrn090

Read all installation instructions before installing product. If retrofitting a parking area, always use cones, barrels or other means to secure the area and alert motorists. Confirm installation height meets local building codes, if any apply.

1. Position corner guard retainer at appropriate height on the wall. Mark the per-drilled holes from each wing of the corner guard retainer onto the substrate it is being installed on. When finished, remove corner guard retainer from corner.

2. Drill the marked hole locations using a 5/16" [8mm] drill bit. Make sure holes are clean and free of debris and dust, blow out holes with compressed air if required.

3. Insert supplied 5/16" x 1-5/8" [41mm] flanged alligator anchors (found in hardware pack JK182) into the drilled holes.
